

Description:	Immobilized Peptide ELISA titer determination of 4 samples			
Peptide:	#14-040			
Assay Reference:	#14-090			
Samples:	# 102	# 107	# 116	Diluent
ELISA Activity <sup>1</sup> :	41,271	25,423	744	< 50

<sup>1</sup> ELISA activity is expressed as the dilution at which the sample exhibits a 0.500 absorbance. It is determined via linear regression between the two data points on either side of 0.500. The average of two determinations is reported.
